Laboratory No : 19VI009717
Animal ID : KODIAC EX DOLPHINA 17
Mchip/Passport:
Owner : YEOMANSTOWN STUD
Species : EQUINE
Sample Date : 25/04/19
Receipt Date : 25/04/19
Specimen : NASOPHARYNGEAL SWAB

Title: VIROLOGY REPORT

Report Date: 26/04/2019

INAB accreditation ISO17025 applies only to the detection of Equine Herpesvirus Type 1 (EHV-1) DNA by PCR, the detection of Influenza Type A RNA by PCR and the detection and quantification of Equine Influenza Virus antibodies by the Haemagglutination Inhibition technique and the Single Radial Haemolysis technique.

Test Method: PCR TEST

INFLUENZA TYPE A PCR REPORT

PCR FOR EQUINE INFLUENZA (FOC)

Analysis Date 25/04/2019
Influenza Type A PCR NOT DETECTED

Note Type A Influenza Virus RNA was not detected in the nasal secretions by the Polymerase Chain Reaction (PCR) test.

Test Method: SOP PM2.032.

Signed: Ann A. Cullinane Date: 26/04/2019

Ann A. Cullinane, MVB, PhD, MRCVS
 Head of Virology

To continue to develop our service to the industry, all samples are retained for research purposes unless we receive a written request for exemption. The above results relate only to the items tested. This report shall not be reproduced, except in full, without the prior written approval of the laboratory.
