C.E.M. CERTIFICATE

This certificate must be submitted online before arrival of the Lot at Park Paddocks or at the duplicate or outside standing.

The Vendor or his/her Agent is solely responsible for the accuracy of this certificate.

To be completed by a Veterinary Surgeon:

A set of swabs should be taken from the cervix **AND** clitoris (fossa and sinuses) during an oestrus period **AND** a second clitoral swab (fossa and sinuses) should be taken at least 7 days after the first set of swabs. The second clitoral swab should be taken **WITHIN 30 DAYS OF THE SALE (i.e. from June 8th onwards)**. All swabs must have been taken after the last date of covering. Swabs must be submitted to a Laboratory approved by the Horserace Betting Levy Board (HBLB) in the United Kingdom or to National Approved Laboratories in all other countries and be cultured under both aerobic and microaerophilic conditions or tested by PCR.

On the (Date) during an oestrus period swabs were obtained from the **CLITORIS (FOSSA AND SINUSES)** and **CERVIX** of the mare (Name).

On the (Date) a second swab was obtained from the **CLITORIS (FOSSA AND SINUSES)**. Both sets of swabs were submitted for bacteriological examination for C.E.M. at the Laboratory and cultured under both aerobic and microaerophilic conditions or tested by PCR.

The results were negative. Neither *Klebsiella pneumoniae* nor *Pseudomonas aeruginosa* were isolated.

Signed M.R.C.V.S.
