TATTERSALLS SALES 2024
EQUINE INFECTIOUS ANAEMIA (EIA)
COGGINS TESTING

MANDATORY TESTING REQUIREMENTS FOR
POST-SALE MOVEMENT
ALL LOTS

- EIA testing must be carried out using the Coggins method and the blood sample should be taken within 70 days of the Sale for all Lots.
- This test must be carried out at the APHA Weybridge Laboratory in the UK, at the IEC in Ireland, or at an accredited laboratory in the country of export. This will allow the prompt export of those Lots returning to the EU after sale, or those Lots not sold which wish to return to an EU country.
